EDUCATION

University of Southern California	Los Angeles
Master of Science in Computer Science	August 2025-December 2026
Data Visualization, Geospatial Data Analysis, ML, Analysis of Algorithms	
University of Southern California	Los Angeles
Bachelor of Science in Computer Science (minor: GIS and Sustainability Sciences)	August 2022-December 2026
AI, Internetworking, Data Structures, iOS App Development, Discrete Methods, Linear Algebra, Probability, Human Computer Interaction, Spatial Reasoning, ArcGIS, Spatial Statistics	

TECHNICAL ASSETS

- JavaScript, TypeScript, Python, C++, Swift, Java, SQL, MongoDB, Firebase, Next.js, PyTorch, GitHub, Figma

SPATIAL RESEARCH AND APPLICATIONS

University of Southern California	Los Angeles
Research Assistant	Jun 2025-Present
- Develop solutions for model representation of large weather dataset for spatiotemporal statistical queries using PyTorch. - Geocode public data points and enrich with web-scraped metadata for geospatial analysis with attribute mapping. - Presented findings from literature review and geospatial analysis on data using ArcGIS at APCG’s Poster Session.	
Los Angeles Department of Transportation	Los Angeles
GIS and Software Engineer Intern	September 2025-December 2025
- Administered object detection model training leveraging YOLO models and increased all confidence scores above 90%. - Developed reusable Python automation scripts and interfaced with Mapillary API to accelerate engineers’ workflows by 20%.	
USC Spatial Hackathon: Vertical Studio Challenge	Los Angeles
Prompt: Building Resilience for People & Place After the Eaton Fire	February 2025
- First Place StoryMap proposal to LA County’s Urban Planning representatives (https://arcg.is/15aGjW1). - Analyzed LA’s fire alert system and used ArcGIS to suggest placement of outdoor sirens.	

SOFTWARE ENGINEERING

ENXTI – Fashion E-commerce Startup	Los Angeles
Founding Software Developer	December 2025-Present
- Integrated Shopify with GraphQL queries and developed custom MongoDB API endpoints for user management. - Implemented key features weekly, including webhook logic configuration and UX redesign, preparing the MVP for user growth. - Supervised a 5-person developer team for non-technical founders to build React Native app and Next.js web app MVP using TypeScript with Stripe and Firebase integration.	
Optivide – Climate Finance Startup	Los Angeles
Software Developer Fellow	May 2026-Present
- Built cross-platform mobile app using React Native framework with Google Cloud-hosted backend and database. - Integrated AI in spec-first development and code review, along with GitHub Actions, to produce higher-quality code.	
TourScout	Los Angeles
Software Engineer Intern	June 2025-July 2025
- Revamped review-button creation flow, allowing customizable review buttons and real-time rating updates from the database, effectively automating the process and eliminating manual maintenance for the non-technical founder. - Built an information visualization panel with multi-tenant CRUD and real-time updates, increasing retention rate by 40%.	

LEADERSHIP EXPERIENCE

HackSC	Los Angeles
Executive Director	2023-2024
- Executed USC’s flagship hackathon with 300 participants, handling venue logistics, catering, and judging coordination. - Led negotiations to secure \$50K in prizes and sponsorship funding through consistent communication and quality event output.
